

Municipal Concrete Repairs

City of Hampton
Virginia

THE PROBLEM

The concrete around the city of Hampton, Virginia was in need of repair and city officials wanted the various issues fixed as efficiently as possible. One of the largest challenges was the diversity of their issues which included roadway slabs, curb & gutter, bridge approaches, stormwater drop inlets, and even at the fire department where the slabs needed to support their 40,000+ pound firetrucks.

OUR SOLUTION

By injecting our specialized polyurethane foam around all of the damaged areas, the City of Hampton's diverse concrete issues were repaired without having to be replaced. JACKCRETE's main advantage was the speed of our work since all repairs were made to heavily-used infrastructure. Our unique process and the expertise of JACKCRETE's applicators significantly reduced the impact to residents by minimizing or completely avoiding road and bridge closures.

PROJECT HIGHLIGHTS

- *Over 1,000 slabs repaired*
- *Over 34,000 sq. ft. of concrete repaired*
- *Roadway and bridge closings minimized or avoided*
- *Hundreds of thousands saved compared to the cost of replacement*

Hotel Sidewalk Repairs

Shamin Hotel Management Company
Virginia

THE PROBLEM

With properties across the East Coast, Shamin Hotels was having trouble maintaining the quality and safety of walkways at their hotels. For a management company representing top brands and focused on providing exceptional facilities, the presence of dangerous trip hazards was a problem that had to be eliminated as quickly as possible without any disruption to guests.

OUR SOLUTION

JACKCRETE restored the safety of the walkways at 31 of Shamin's 40+ hotels over the course of just 7 days. This was accomplished by scheduling projects by proximity along the 1,300 mile route to ensure multiple hotels were repaired each day. Overall, JACKCRETE lifted over 300 slabs that posed a danger to guests at properties from Glen Allen to Suffolk without disruption.

PROJECT HIGHLIGHTS

- 31 projects completed in just 7 days
- Over 7,800 sq. ft. of concrete repaired
- No disruption to hotel guests
- Over \$59,000 saved compared to the cost of replacement
